

# LAI-2200C Plant Canopy Analyzer

## World standard for indirect LAI measurements

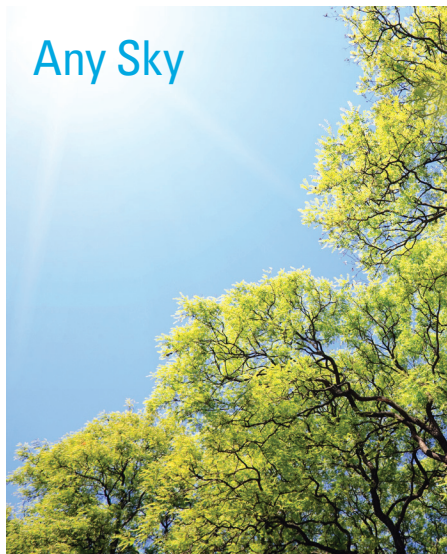

The LAI-2200C Plant Canopy Analyzer is a non-destructive way to easily and accurately measure Leaf Area Index (LAI). It consistently outperforms other methods in terms of flexibility, advanced features, accuracy, and ease of use.

### Canopy Variety

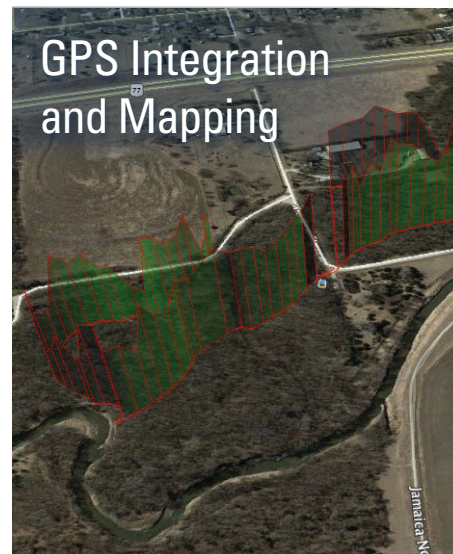

Computes LAI even in row crops and isolated trees that other methods can't measure.

### Any Sky

Accurate in most daylight conditions, unlike other methods which require specific sun angles or cloud cover.

### GPS Integration and Mapping

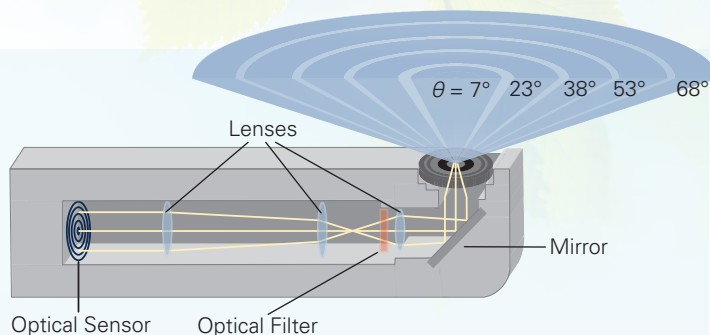

Internal GPS module integrates data into the LAI file for easy mapping in Google Earth.

# LAI-2200C Plant Canopy Analyzer

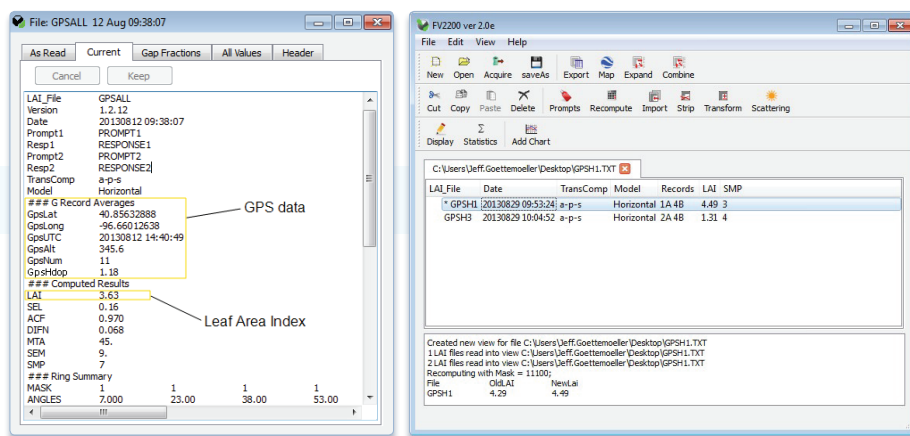

## True Gap Fraction

Measures five zenith angles in a single measurement.

## Additional Features

- Automatic and independent logging
- Simple, yet powerful software
- Light weight handheld console

## Ordering Information

### LAI-2200C Plant Canopy Analyzer

Includes one LAI-2250 Optical Sensor with data cable, GPS enabled LAI-2270C Control Unit, carrying case, USB cable, view-restrictors, diffuser caps, 6 "AA" batteries and belt clip.

### LAI-2200TC Plant Canopy Analyzer – Tall Canopy Package

Two LAI-2250 Optical Sensors with data cables, one GPS enabled LAI-2270C Control Unit, carrying case, USB cable, view-restrictors, diffuser caps, 8 "AA" batteries and belt clip.

### 2200CLEAR Clear Sky Kit with GPS Upgrade

#### For current LAI-2200 owners

Includes GPS board, flex cable, Anti-static wrist strap, 2 light diffuser caps and instructions.
