

Remote Access to Your Environmental Data at Any Time, from Anywhere

Key Features

- Cloud-based platform for all Internet of Things (IoT) connected sensors
- Access and store data from any environmental sensor via cellular or Iridium satellite
- Plot data/visualize trends
- Security Features:
 - Disable GPS reporting
 - Tampering/movement alerts

Data Collected

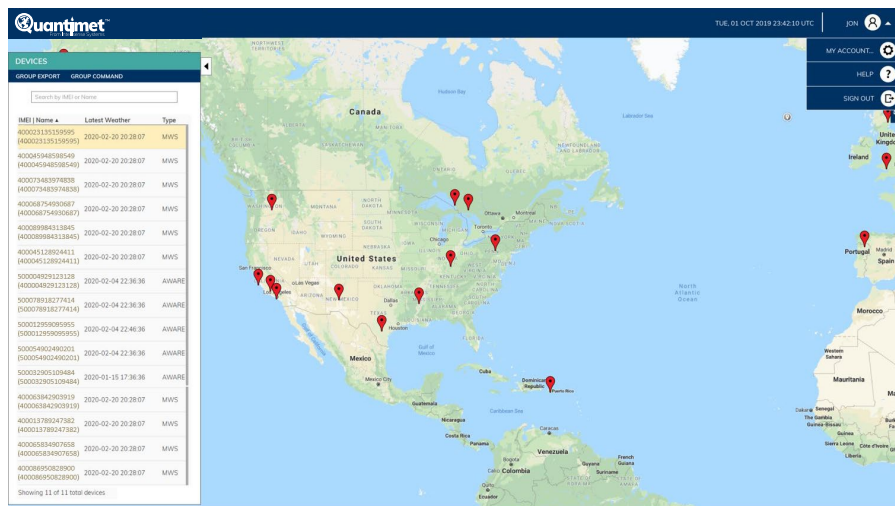

- Site Imagery
- Temperature
- Barometric Pressure
- Humidity
- Wind Speed
- Wind Direction
- Angular Tilt
- Visibility
- Dust Accumulation
- Lightning Distance
- Compass Reading
- Precipitation Amount
- Present Weather
- GPS and Elevation
- Cloud height (MWS-C6XX models only)
- Water Level (AWARE Flood)
- Acoustic spectrum (optional)

QuantimetTM is the cloud-based software solution from Intellisense Systems that enables you to access and export data from Internet of Things (IoT) connected environmental sensors at any time and from anywhere. With Quantimet, you can view data, receive status updates, and remotely command environmental sensors located around the world via cellular, satellite, and RF communications from any Internet-enabled device. This service stores your data using a cloud-based data logger so it is always available, helping prevent lengthy trips into the field where your devices are located.

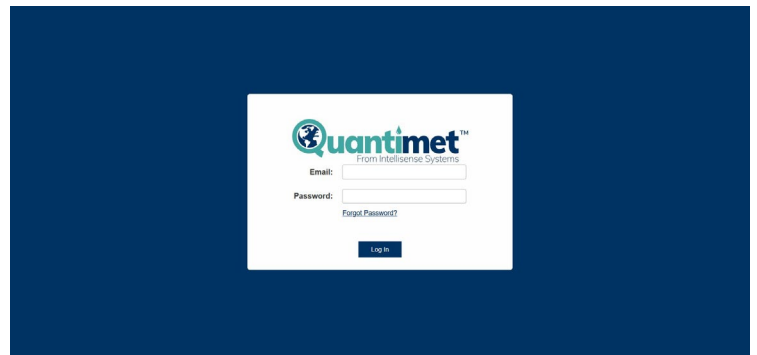

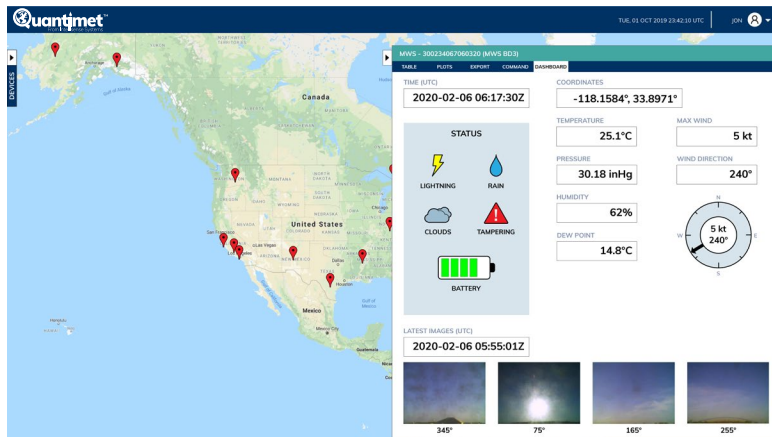

With a clear world map and user-friendly interface, Quantimet delivers a complete overview of every one of your field-emplaced sensors on all seven continents. You can also plot and visualize trends, as well as retrieve images from the sensor site. Intellisense also ensures the security of your sensors by disabling GPS reporting and sending alerts to movement or tampering.

KEY FEATURES

Security & Privacy

Logging in at Quantimet.com protects the privacy of your sensors by offering a secure login and account permissions. The software can also send alerts when sensors move or tampering has been detected. Users can also choose to disable GPS reporting to ensure that your sensors' locations remain hidden.

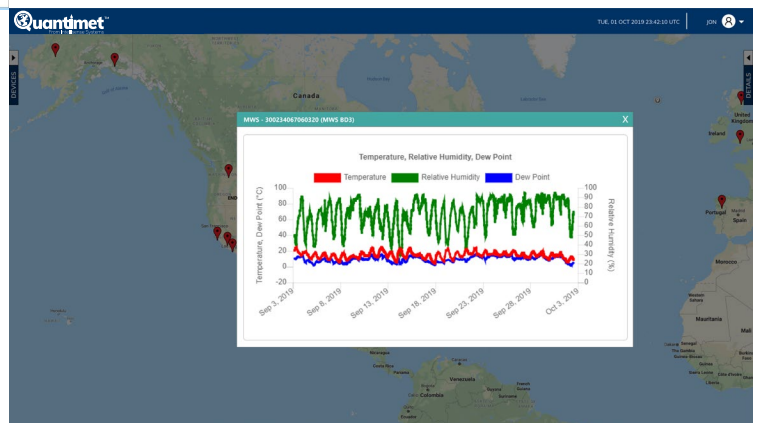

Remote View & Commands

Quantimet delivers a complete overview of your sensors with both the devices panel and the IMEI window. You can view your data as a parameter view or in METAR format. The software also enables users to remotely send commands or change the reporting frequency, helping to prevent costly trips to the sensor site.

Visualize Trends

Users can plot and visualize data from one or multiple sensors to plot trends or identify environmental changes over time. This data can be accessed and exported using Quantimet's cloud-based data logging capabilities.

Data Access, Storage, and Exporting

Cloud-based data logging at Quantimet delivers cost savings, a nearly infinite storage capacity, instant availability, and backup protection to ensure that your data is safe and readily accessible.
